

TRANSITION CITIES  
Workshop on Buildings  
Valencia and Castellón  
6th-7th October 2014

**AJUNTAMENT  
DE VALÈNCIA**

## CLUSTER WORKSHOP WITH STAKEHOLDERS

Day 1 EDIFICIO DE TABACALERA, Amadeo de Saboya, 11 (*to be confirmed*)

09:00 Valencia Smart Strategy presentation and visits to different sustainable municipal buildings in the city of Valencia.

+ ***Geothermal energy building in the 5th Unity Police building of Valencia***

The building has been built following functional and energy efficiency criteria. It includes a geothermal system that reduces the heating/cooling consume.

+ ***Sports center of Malilla***

Installation of new technology for saving energy. The building will save 84% of heating, 52% of electric energy and 60% of water.

+ ***Energy efficiency in Tarongers Library of the University of Valencia***

Use of energy efficient technology; prototype installed allows to save more than 50% of energy (nearly 65%)

13:00 Lunch

14:30 Introduction to Transition Cities project

15:00 Results of cluster analysis of buildings systems

15:45 Examples and links in low emission buildings – stakeholder comments & discussion

16:30 Examples and links in energy demand management– stakeholder comments and discussion

17:15 Review of overall buildings cluster
